

ABOUT ME

I am Pumuditha Lakshan, a graduate ICT student specializing in Network Technology at the University of Sri Jayewardenepura, with 1 year and 6 months of industry experience in data systems, cybersecurity, and software development. I have hands-on experience in building secure systems, developing web and desktop applications, managing networks, and working with cloud and security tools. I am passionate about data-driven systems, cybersecurity, and developing scalable, real-world technology solutions.

TECHNICAL SKILL

- Data Warehouse & Database Management
- Full-Stack Development & API Integration
- JavaScript, PHP, Python, C#, AI
- MySQL, MongoDB, PostgreSQL
- Version Control (Git & GitHub)
- UI/UX Design (Adobe XD, Figma)
- Cloud Platforms (AWS, Google Cloud, Azure, Hostinger)
- System Administration (Linux/Ubuntu & Windows)
- Docker & Containerization
- AI & Machine Learning
- Network Administration & Infrastructure Security
- Cyber Security & Threat Monitoring
- Penetration Testing & Vulnerability Assessment
- Security Monitoring & SOC Tools (Wazuh, Zeek, TheHive, Cortex, MISP)
- Firewall, VPN & Email Security Management

Education

**Bachelor of Information and Communication
Technology (BICT) Degree**

2021 - 2025

University of Sri Jayewardenepura, Sri Lanka

Professional Experience

**Centre for Defence Research and Development -Ministry
of Defence Srilanka**

Intern – System Development &
Cyber Security

2024 JUL - 2025 JAN

- Developed a VAPT-based automated vulnerability assessment system using Nmap, OpenVAS, and Metasploit
- Developed a Laravel-based traffic control and monitoring system with API integration, real-time analytics, and automated reporting.
- Contributed to the implementation of an open-source SOC (Wazuh, Zeek, TheHive, Cortex, MISP) for L1/L2 log analysis and threat intelligence correlation.
- Developed a server room alert monitoring system using Raspberry Pi and temperature monitoring sensors for real-time environmental tracking.
- Performed web and hardware penetration testing and supported AWS infrastructure setup (VPN, Kubernetes).
- Configured and secured routers, switches, and firewalls within enterprise environments.
- developed the Chrome extension to analyze and audit website cookies in real-time.

Acorn Group

Intern – System Development &
Cyber Security

2025 JUL - 2026 JUL

- Developed a cross-platform desktop application using Electron, integrated with a Flask backend server to manage client connections and enable secure message communication.

- Power BI, Excel, Grafana, Kibana
- Laptop, Printer & Peripheral Device Troubleshooting

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Time Management
- Adaptability
- Attention to Detail
- Research & Innovation Mindset

LANGUAGE

- English
- Sinhala

RESEARCH

Researched and developed a secure video steganography platform using Flask and WebRTC, enabling encrypted image, text, and video data embedding within video streams for secure communication during campus studies at the University of Sri Jayewardenepura.

REFERENCE

Dr. Nuwan Kuruwitaarachchi Ph . D

Senior Lecturer
Department of Information and Communication Technology
Faculty of Technology
University of Sri Jayewardenepura
Mobile: 077 222 3674 Email: kuruwita@sjp.ac.lk

Mr.Kavindu Chethiya Yakupitiya

Lecturer
Department of Information and Communication Technology
Faculty of Technology
University of Sri Jayewardenepura
Mobile: 071 057 5073 Email: yakupitiya@sjp.ac.lk

- Developed an AI-powered itinerary Word document generation platform using Flask, enabling dynamic content creation and automated document processing.
- Deployed and maintained Laravel, Flask, and React web applications on Ubuntu-based production servers
- Monitored Cortex XDR, Palo Alto firewalls, and managed Sophos email security systems.
- Configured and maintained Grandstream devices, FreePBX servers, and enterprise network switches.
- Prepared Functional Requirement Documents (FRD) and system flow diagrams for development projects.

LIVE PROJECTS

Web-based application (Flask)

- [HR Notification](#)

Mobile application (Flutter)

- [GOWEEK](#)
- [FINTRACK](#)

PROJECTS EXPERIENCE

Python and Flask framework

- The Server Room Alert Management System.
- Video steganography platform
- Cybersecurity tools
- Keylogger capture

Web application (Laravel framework)

- (AttendMe) web-based QR attendance marking system
- (ParkHUB) web-based Traffic Control and Monitoring System
- Smart canteen management system
- Online doctor booking platform

Web application (.NET framework)

- Pet management system
- Calculator
